EDUCATION

Vellore Institute of Technology – AP

B.Tech in Computer Science & Engineering | CGPA: 8.51/10

PROJECTS

AI Code Reviewer | *React.js, Node.js, Express.js, Gemini API*

- Built an AI-powered code review platform that analyzes source code and generates optimization, debugging, and best-practice recommendations.
- Integrated Gemini API to provide real-time feedback on code quality, performance, and potential bugs.
- Developed backend APIs using Node.js and Express.js for prompt handling and response processing.
- Created a responsive React.js interface for code submission and review visualization.

AI-Powered Applicant Tracking System (ATS) | *React.js, TypeScript, Puter.js, AI APIs*

- Developed a full-stack AI-powered Applicant Tracking System that analyzes resumes and provides automated feedback on ATS compatibility.
- Implemented secure user authentication, resume upload functionality, and cloud-based storage for resume management.
- Integrated AI services to evaluate resumes against hiring criteria and generate actionable improvement suggestions.
- Built PDF processing pipelines to extract resume content and generate structured candidate insights.
- Designed an interactive dashboard to track uploaded resumes, feedback scores, and analysis history.
- Deployed the application for real-time resume evaluation and candidate assessment.

Digital Banking & Transaction Processing System | *Node.js, Express.js, MongoDB, JWT, Nodemailer*

- Developed a secure banking backend supporting user registration, authentication, account management, and transaction processing.
- Implemented JWT-based authentication, bcrypt password hashing, and middleware-driven authorization mechanisms.
- Designed account, transaction, and ledger models to maintain accurate financial records and balance calculations.
- Built idempotent transaction APIs to prevent duplicate financial operations and ensure data consistency.
- Utilized MongoDB aggregation pipelines to derive account balances and transaction histories efficiently.

TECHNICAL SKILLS

Languages: Java, Python, C++, JavaScript, SQL

Frameworks & Libraries: React.js, Spring Boot, Pandas, NumPy, Matplotlib

Databases: MySQL

Tools & Platforms: Git, GitHub, VS Code, Streamlit, Excel

Core Subjects: Data Structures & Algorithms, Database Management Systems (DBMS), Operating Systems, Computer Networks

CERTIFICATIONS

- AWS Cloud Foundations Certification
- AWS Cloud Architecting Certification

ACHIEVEMENTS

- Solved 200+ LeetCode problems in Java covering Arrays, Linked Lists, Trees, Graphs, Dynamic Programming, Greedy Algorithms, and Sliding Window techniques.
- Maintained a CGPA of 8.51/10 across six semesters of Computer Science Engineering.
